Max panel sizes 4' x 10' and 5' x 8'

Casement Windows

LET IN THE FRESH AIR

The simplicity of design is always on display with a casement window.

This operating type of window provides maximum ventilation and allows the sash to be opened outward to the left or right.

Awning Windows

GO WITH THE GENTLE FLOW

Placed over doors or in combination with other windows, the awning makes a unique and practical statement in many architectural styles. It is hinged at the top and opens out from the bottom in an outward swing.

Single-Hung Windows

S I M P L E & S M A R T

These windows are best suited to traditional architectural styles.

Single-hung windows feature a bottom sash that lifts vertically towards a fixed top sash and tilts in for easy cleaning and maintenance.

Single-hung side load shown

INTEGRAL LIFT RAIL

Windows are meant to be opened. Designed with ease of operation and durability in mind. Lift away and let the fresh air in.

EVEN SIGHT LINES

Achieve total symmetry with our even sight line option. Even sight lines are an available option on single-hung and sliders.

HYBRID SILL

An integral sill riser paired with a sloped and pocketed sill provides improved protection against water infiltration.

CLASSIC DESIGN

A modern take on traditional design. A wide frame offers the appearance of a wood window, while the narrow sash design allows for maximum daylight.

WINDOW OPENING CONTROL DEVICE (WOCD)

WOCD limits the sash opening to less than four inches.

Double-Hung Windows

UNIVERSALLY APPEALING

Double-hung windows are best suited to traditional architectural styles. They feature an upper and lower sash that slide vertically past each other in a single frame. Both sashes tilt in for convenient cleaning.

Fixed, Radius & Geometric Windows

GEOMETRICALLY BEAUTIFUL

Each fixed, radius and geometric window is unique. These windows are direct- or sash-glazed and come in a wide array of beautiful shapes, such as half-round, quarter-round, full-round, segment arch and elliptical.

Sliding Windows

CLEAN & SIMPLE

Clean lines and a streamlined look set the tone for each of our single-sliding windows. One sash in this type of window slides horizontally in grooves or tracks towards the fixed sash.

Bay & Bow Windows

THINK OUTSIDE THE BOX

Add a new dimension to your living space with bay or bow windows. Our bow windows feature a set of joined windows that can open up a small space and increase your view. Bay windows also open up a space and can provide a shelf for plants or decoration. All bay and bow windows are available with head and seat boards and support systems for reliable installation.

Three-light bay window shown with casement flankers shown. Available with single-hung and double-hung flankers.

Sliding Patio Doors

BRING THE OUTDOORS IN

Outdoor living spaces become an extension of the indoors with our Premium™ Vinyl patio doors because they're ideal for nearly any patio or deck. The sliding doors open smoothly and easily by sliding along horizontal tracks. For a French door appearance, select optional wide stiles.

3-PANEL: **OXO, XO O, OOX**

2-PANEL: **XO, OX**

Multi-Slide Patio Doors

A B R E A D T H O F S I Z E S & O P T I O N S

Take a simple and elegant approach to creating large, open spaces. The Premium™ Vinyl Multi-Slide patio door makes a dramatic statement, opening up rooms and connecting seamlessly to the outdoors. Create light open spaces with up to six-panel units reaching 10-feet in height and 24-feet wide. Low maintenance combined with several design choices makes our Multi-Slide patio doors a great choice, especially for smaller budgets.

Performance Glass Options

INSULATED GLASS

High-performance Low-E glass combined with advanced spacer systems and gas sealed between the panes are key elements bringing comfort to you and your home. The JELD-WEN® Premium™ Vinyl windows and patio doors glass package options were designed with energy efficiency in mind.

DOUBLE-PANE PACKAGES

TRIPLE-PANE PACKAGES

TINTED GLASS

Tinted glass reduces glare and is ideal for areas that get a lot of direct sunlight in the summer. We offer green, gray, bronze, reflective gray and reflective bronze tinted glass.

Green Gray Bronze Reflective Gray Reflective Bronze

TEXTURED GLASS

Let light in while maintaining privacy with textured glass. We offer a wide range of textures to meet your aesthetic preferences. Five of our most popular choices are shown here.

Glue Chip Rain Obscure Narrow Reed Seedy Reamy

LAMINATED GLASS

Laminated glass consists of panes of glass with an invisible interlayer, sandwiched together to create an extremely sturdy glass unit. This provides increased protection for home safety and from incidental impact; it also provides an improved barrier against sound and harmful UV rays.

TEMPERED GLASS

This type of glass is treated with heat, so it can withstand greater force or pressure on its surface, and it will not break into sharp pieces.

ENERGY STAR®

Many JELD-WEN® windows and doors are ENERGY STAR® certified, which means they exceed the minimum energy code requirements for the climate region in which you live. JELD-WEN has been a proud ENERGY STAR® Partner since 1998.

Divided Lites

Add architectural interest to your JELD-WEN® Premium™ Vinyl windows with one of our decorative grille options. These options include simulated divided lites (SDL) for an authentic look, full-surround (FS) wood grilles that can be removed for easy cleaning and maintenance-free grilles between the glass (GBG).

GRILLES BETWEEN THE GLASS (GBG)

This option provides style without the upkeep. Select from three widths in flat or contoured metal grilles in many of our clad colors.

SIMULATED DIVIDED LITES (SDL)

For a true "paned" window look, our simulated divided lites feature bars that are permanently adhered to both the interior and exterior glass; a shadow bar between the panes of glass is also available. Choose divided lites in four bar widths.

Screens*

Today's screen options are capable of much more than keeping out insects.

With a fine, black fiberglass mesh and light gloss finish, BetterVue® insect screens do a beautiful job of keeping insects away.*

FIBERGLASS MESH SCREEN

View through fiberglass mesh screen (standard)

BETTERVUE® SCREEN

View through BetterVue® insect screen (upgrade)

PATIO DOOR SCREENS

Choose from aluminum or fiberglass mesh screen options.

*Insect screens are intended to allow air and light in, while keeping insects out. They are not intended to stop children from falling through an open door or window. For safety screens and other security devices, contact your local building supply retailer.

Window Hardware

OPEN TO DESIGN

All hardware pieces are created to beautifully complement the look and style of the windows while operating with surgical precision. There's a certain heft to the quality that you'll feel in the form and finish of every hinge, knob, lock and pull.

About JELD-WEN

DEDICATION FROM DAY ONE

Since 1960, when JELD-WEN began with one millwork plant, we've been dedicated to crafting windows and doors that enhance the beauty and functionality of your home. Today we continue that tradition with products that are durable and worry-free. It's the result of innovation as the driving force in all that we do. It begins in the forests where our Premium™ lumber is harvested. In addition to responsible sourcing practices, we reuse and recycle as much of our raw resources as possible. Innovation is also at the heart of our design and manufacturing process. With JELD-WEN, you can expect products that are more than just beautiful on the outside. The inner workings of our windows and doors are engineered to function flawlessly for years to come.
