EVERY HOME TELLS A STORY

When it comes to design, Joanna's favorite style is anything that's beautiful and timeless and tells a unique story. That's what made the idea of collaborating with James Hardie so easy. With the beautiful, nature-inspired colors and styles of Hardie® siding and trim curated for this collection, Jo created an inspiring palette of possibilities. She's made it easy for homeowners to choose what they want for their exterior transformation.

The Magnolia Home | James Hardie Collection can help you create an exterior you love.

“WHEN PEOPLE TELL THEIR OWN STORY RATHER THAN FEELING PRESSURE TO FIT WITHIN A SPECIFIC STYLE, THERE'S MORE FREEDOM - AND THEIR SPACE BEGINS TO FEEL LIKE HOME.”

— Joanna Gaines

A classic look that stands the test of time.

Hardie® Plank

From Victorians to Colonials, Hardie® Plank is the perfect siding for your style, and has the durability and long-lasting beauty that can transform your home's exterior. With a variety of colors, textures, and sizes, you'll discover a Hardie® Plank style that transforms your home's aesthetic.

Fire

A home's exterior is its first line of defense against extreme weather and fire. Prepare your home for the unpredictable with siding that is noncombustible, won't burn, and will not ignite when exposed to a direct flame.

Recognized by fire departments nationwide.* Listed for use in wildfire-prone Wilderness Urban Interface (WUI) zones in the western US.

- Verified noncombustible per ASTM E136
- Will not contribute fuel to a fire
- Class A fire rated per ASTM E84, with a flame spread index / smoke developed index of less than 0/5
- Verified in wall assemblies with 1-hour and 2-hour fire-ratings per ASTM E119

Cal-Fire Compliant

*Hardie® siding complies with ASTM E136 as a noncombustible cladding and is recognized by fire departments across the U.S. including Chicago IL, St. Paul MN, Flagstaff AZ and Wayne County, OH. Fiber cement fire resistance does not extend to applied paints or coatings, which may be damaged or char when exposed to flames.

Fire Demonstration:
Hardie® Fiber Cement Siding vs. Vinyl, Engineered Wood and Cedar

Pests

Creatures can wreak havoc on wood-based siding. It can be pecked by birds or damaged by termites and other pests. Hardie® fiber cement holds no appeal for these critters, saving you the maintenance hassle.

Pest Testimonials:
Hardie® Fiber Cement Standing Up to Pests

Water Resistant

From rain to ice to snow, precipitation patterns can lead to warping, swelling and cracking in wood-based siding. Take shelter from the storm knowing that your siding is built to resist water damage.

- FEMA Class 5 flood damage resistance (highest rating)
- Rated for use in High Velocity Hurricane zones by Miami-Dade County, Florida

Water Demonstration:
Hardie® Fiber Cement Standing Up to Water

Time

ColorPlus® Technology finishes provide a durable finish that helps resist fading and discoloration that outperforms field applied paint, so your exterior can keep its good looks longer.

Exterior solutions inspired by nature. And designed to protect your home from it.

Hardie™ Zone System

Only Hardie® fiber cement exterior products are Engineered for Climate®, designed specifically with your climate zone in mind for optimal performance. In the northern USA and Canada, HZ5® products resist shrinking, swelling and cracking even after years of wet or freezing conditions. HZ10® products help protect homes from hot, humid conditions, blistering sun and more.

With Hardie® siding, trim and soffit, your home's exterior will be as tough as it is beautiful.

The highest-quality materials for your highest satisfaction.

Unique Formulation Hardie™ Zone Substrate

Not all fiber cement is the same. Hardie™ Zone formulations require raw materials that meet our stringent quality standards. Our unique formulation, combined with innovative product design and manufacturing processes, creates a substrate that is specifically engineered to resist moisture, cracking, shrinking and swelling, for increased durability and workability.

Proprietary enhancements create durable Hardie® siding

Perfect balance of strength and workability

Our unique balance of high-quality Portland cement, sand and cellulose fiber delivers the best combination of strength and workability.

Enhanced moisture resistance for unmatched durability

Patented and proprietary additives are chemically bonded within the substrate matrix to provide durable moisture resistance.

Increased dimensional stability

Our siding is engineered at the microscopic level to create a fiber cement composite with superior dimensional stability that helps protect against shrinking and splitting.

● James Hardie Manufacturing Plant

32 11 manufacturing facilities in the United States which source 81% of their raw materials locally

Unmatched investment in manufacturing scale and production innovation

- Largest manufacturer of fiber cement in North America
- Over 7x the North American manufacturing capacity of our nearest fiber cement competitors
- More than 100 process and product quality checks
- Over 85 scientists and engineers in North America's research & development providing dedicated resources for continuous innovation in manufacturing and product development
- More U.S. fiber cement patents than any competitor

*As of March 2024

Building a Better Future for All™

Raising our level of ambition.

James Hardie is committed to improving our sustainability performance proactively by carefully managing our social and environmental impacts. To help us track and assess our progress, we established sustainability goals that align directly with issues that matter most to our stakeholders and our overall corporate objectives.

Building a framework for a bold and bright future

Purpose
Building a Better Future for All.™

Vision
To inspire how communities design, build and grow today and tomorrow.

Mission
Be the most respected and desired building materials brand in the world.

Finishing Technology

Primer

A quality primer is the first step to ensuring that the paint color you select expresses your home's true beauty now – and for years to come. Our distinctive primer is climate tested and engineered to enhance the performance of paint on Hardie® fiber cement exterior solutions. It helps to provide consistent, long-lasting paint adhesion, even in the most demanding conditions.

ColorPlus® Technology

Our advanced ColorPlus® Technology finishes deliver the ultimate in aesthetics and performance. Our products aren't simply painted at the factory. Our proprietary coatings are baked onto the board, creating a vibrant, consistent finish that performs better, lasts longer and looks brighter on your home.

Exceptional finish adhesion

Our proprietary coatings are engineered for exceptional adhesion to our substrate and applied to the surface, edges and features for durable performance.

Superior color retention

The finish is cured onto boards for a stronger bond, which allows for exceptional resistance to cracking, peeling and chipping.

Superior UV resistance

ColorPlus® Technology finishes retain vibrancy longer compared to vinyl siding and the typical field paints used on other siding products.

Beauty begins with a finish that lasts.

ColorPlus® Technology

ColorPlus® Technology finishes are fully cured on our boards in a controlled factory environment and arrive at your home ready for installation year-round. With prefinished color products, you'll have peace of mind, knowing you'll have a more consistent color and finish that doesn't depend on good weather.

With a variety of color options available to help bring your vision to life, ColorPlus® Technology finishes help keep your home looking beautiful longer.

Unparalleled beauty with unparalleled performance.

See the James Hardie difference

James Hardie invented modern fiber cement. Over 10 million homes* later, we continue to set the standard in premium, high-performance exterior cladding. Our products deliver uncompromising durability and finish quality for a beautiful, lower-maintenance exterior.

Our unrivaled investment in R&D and constant innovations in product design, manufacturing and distribution allow us to remain steps ahead of the competition. With the support of our employees and partners, and with our exceptional warranties, we're committed to helping protect your home and investment every step of the way.

Industry-leading warranty for peace of mind

Protect your home with North America's #1 Brand of Fiber Cement siding, soffit and trim, backed by exceptional limited warranties. Unlike other companies, we don't prorate our James Hardie substrate warranty coverage. All Hardie® fiber cement products come with a transferable 30-year, non-prorated limited substrate warranty, meaning we stand 100% behind Hardie® fiber cement siding, trim and soffit products for 30 years.

ColorPlus® Technology finishes come with a 15-year limited warranty.

30-Year, Non-Prorated Siding, Trim and Soffit Substrate Warranty Coverage by James Hardie

Endorsements — a reputation built on trust

For decades, our fiber cement products have been used to create better places to live. That proven track record has earned us the loyalty of millions of homeowners and the endorsements of trusted authorities across the building industry.

Hardie® products* are backed by the Good Housekeeping Seal.

*Includes Hardie® Plank (primed and with ColorPlus® Technology), Hardie® Trim with ColorPlus® Technology, Hardie® Backer, and Hardie™ Weather Barrier

FOR THE PROS

Protection that performs at every layer.

Hardie™ Moisture Management Products

No exterior cladding can prevent 100% of water intrusion. Your home should have an additional line of defense. Hardie™ Moisture Management products provide a superior balance of water resistance and breathability, keeping the area within the wall drier. This helps prevent moisture accumulation that may lead to mold and mildew growth.

Installation advantages of Hardie™ Weather Barrier

- Thicker, more durable material for long lasting protection from water infiltration
- Superior tear resistance for easier, quicker installation
- Can be installed with staples in place of cap nails for cost savings
- Provides a higher level of performance, no matter what type of cladding you specify

Installation Done Right

INSTALLATION ACCESSORIES

Hardie™ Blade Saw Blades

Manufactured by Diablo, the Hardie™ Blade saw blade is designed specifically to cut fiber cement products and is the only saw blade James Hardie recommends. The blade creates clean, precise cuts while helping to reduce the amount of airborne dust produced.

PacTool® Gecko Gauge

The PacTool® Gecko Gauge is designed to improve the installation experience, allowing one person to hang Hardie® lap siding during installation. The manufacturer claims the Gecko Gauge can improve the speed of solo installation by up to 30%.

Finishing Touches

COLORPLUS® TECHNOLOGY ACCESSORIES

Touch-Up Kits

Specially formulated to match ColorPlus® Technology finishes, our touch-up kits offer resistance to aging, color change and chalking. Estimated one kit per 4,000 sq ft of siding or 1,600 sq ft of trim.

Color-Matched Caulk

OSI® QUAD® MAX sealant offers a high-performance sealant solution to color match Statement Collection® products.* About 18–20 linear feet per tube. Refer to packaging for manufacturer's recommendations.

*For matching Dream Collection® products, contact your local James Hardie representative.

TRIM ACCESSORIES

Flat Tabs

Eliminate face nails and improve the aesthetic of trim applications around windows, doors and band boards.

Corner Tabs

Use corner tabs to eliminate face nail holes that would detract from the finished look of corner trim installations.

Scan code to view install and technical documents.

PacTool and PacTool Gecko Gauge are registered trademarks for General Tools & Instruments Company LLC. QUAD® MAX is a registered trademark for HENKEL AG & CO. KGAA. Diablo is a registered trademark of Freud America, Inc.
