## INTERIOR MOULDING & TRIM

Florida

# WE ARE METRIE

For nearly a century, we've honed our love of beautiful millwork to deliver solutions beyond measure. Our focus on high-quality products and dedication to providing personalized support have helped us grow from a small, family-owned business into the largest supplier and manufacturer of solid wood and composite moulding in North America.

## EXCEPTIONAL EXPERIENCES, EVERY DAY

We're more than a millwork company. We're a trusted partner serving those in the pursuit of a remarkable home.

Metrie creates high-quality, finely crafted architectural elements that help people transform houses into homes. Because we understand that when you're home, you're whole.

# EXTENSIVE REACH WITH A LOCAL FEEL

Metrie has the broad reach and supply chain expertise of an industry leader with the personal touch of a family business.

We operate six domestic manufacturing facilities between the U.S. and Canada, and we are the largest manufacturer of MDF moulding in North America.

## TAILORED SOLUTIONS

We listen to our customers to interpret trends and solve pain points so we can make it easier for them to succeed.

Our mills allow us the flexibility to provide the right solutions to the markets we serve, understanding regional differences and adhering to strict specification standards.

Get inspired today with

## STORAGE, HANDLING, AND PREPARATION OF ALL MOULDINGS AND S4S BOARDS

Prior to installation, it is important to acclimate your moulding and trim products by storing them in the installation space for at least 3 days. Wood and wood based products can expand and contract depending on internal and external environmental moisture levels. For best results, be sure to store products in a dry location and transport only if fully protected from water. Keep products clean from dirt and debris and finish according to paint and stain manufacturers' recommendations.

- 1 ARCHITRAVES:** In classical architecture, it described the main beam resting on the tops of the columns. Today it is often used as a decorative moulding for ornamentation or finishing at the top of windows and doors.
- 2 BASEBOARDS:** Baseboards are placed along the wall at the floor. They should be chosen to work in harmony with your casings to finish and tie the room together. Baseboards are usually thinner than the casing.
- 3 BUILD-UPS:** Combining two or more moulding profiles to create a new or custom look. Also called stacking, build-ups make it easy to create the look of custom made trimwork without the high cost.
- 4 CASINGS:** Casings define the overall character of a room and are often the most visible part of the trim. They are used primarily to cover the gap between drywall and the door or window frame. Casings are generally thicker than the base mouldings.
- 5 CROWNS:** Crowns are placed along the wall at the ceiling. They come in a wide range of patterns and sizes. Crowns soften the transition from wall to ceiling while adding a distinctive look and charm to your room.
- 6 FINISH BOARDS:** Finish Boards come in either S4S (Surfaced 4 Sides) or S3S (Surfaced 3 Sides) and are used for a multitude of purposes including shelving, window liner, bases, casing, etc.
- 7 PANEL MOULDS:** Panel Moulds are used to frame wall paneling and add an accent to your walls. Often used in furniture construction.
- 8 RAKE MOULD:** Rakes are often used as crowns. In fact, they are sometimes called "solid crowns".
- 9 WAINSCOT:** Trimwork installed in the area below a chair rail. Numerous options are available including raised panel, shadow box and beaded. Combined with a chair rail and baseboard, Wainscoting creates a dramatic look to any room.
- 10 WINDOW STOOL:** Also called window sill, a Window Stool is the surface installed below the sash of a window. Trim installed under window stool creates a distinctive look and adds a decorative touch.

BASEBOARDS

Your look starts here – at the foundation of a room. A great baseboard complements a casing and creates a smooth transition from the wall to the floor, guiding you seamlessly from room to room.

CASINGS

Casings bring a room together – left to right, top to bottom. And like any framing element, the options are endless, from build-ups of multiple pieces to full wraps. With casings, there’s no wrong way, only your way.

## CHAIR RAILS

The chair rail runs along the wall, parallel with the baseboard. Adding a refined decor to any space, it's the subtle choice that makes a big impact. The chair rail perfectly complements a wainscot design.

## MISCELLANEOUS

### ARCHITRAVES

High above windows and doors, architraves work to add grandeur to any space – reducing miter lines and elevating your look. A great architrave is, above all else, the dressing that's built to impress.

**STOCK CODE**  
5010LM  
(1416182)

**DIMENSIONS**  
1 3/16" x 5 1/4" x 16'

**MDF/UL**

### BED MOULDS

Similar to crown moulding, used to cover the joint between the ceiling and wall. Can be either sprung or plain, or flush to the wall as an extension of a cornice mould.

**STOCK CODE**  
75P  
(1382995)

**DIMENSIONS**  
9/16" x 1 5/8" x 16'

**PFJ**

### BRICK MOULDS

A brick mould is mainly used as exterior casing around doors. The most common size is 2"; however, 1 1/2" and 1 1/4" sizes are available. Brick moulds can also be used in place of a crown and as a transition under window sills.

## BASEBOARD CAPS & SHOES

Baseboard caps are added to the top of regular baseboard moulding and flush to the wall to create a finished and more complex architectural moulding. Baseboard shoes are primarily used to trim flooring materials and are often used in combination with a traditional baseboard to conceal variations between the flooring and the base. However, this versatile profile works great to solve numerous trimming needs.

# MISCELLANEOUS

## DOOR STOPS

The door stop mouldings are attached to the door jamb on both sides and at the top. It is where the door comes to a rest when it is closed, stopping the door from moving any further, and covering the gap that would otherwise appear between the door and the jambs.
