METRIE.COM

# WE ARE METRIE

Operating eight domestic manufacturing facilities between the U.S. and Canada, we are proud to be the largest manufacturer of MDF moulding in North America.

With our commitment to product quality and waste reduction, we're building a brighter more responsible Metrie.

## EXTENSIVE REACH WITH A LOCAL FEEL

Metrie has the broad reach and supply chain expertise of an industry leader with the personal touch of a family business.

Since 1926, we've honed our love of beautiful millwork into solutions that transform houses into remarkable homes, backed by expert support that ensures your project is in good hands.

### **STORAGE, HANDLING, AND PREPARATION OF ALL MOULDINGS AND S4S BOARDS**

Prior to installation, it is important to acclimate your moulding and trim products by storing them in the installation space for at least 3 days. Wood and wood based products can expand and contract depending on internal and external environmental moisture levels. For best results, be sure to store products in a dry location and transport only if fully protected from water. Keep products clean from dirt and debris and finish according to paint and stain manufacturers' recommendations.

### ARCHITRAVE

#### CATEGORY DESCRIPTION

An architrave is a form of trim used to accent the top of a doorway, window or opening. It is also referred to as a header or pediment. High above windows and doors, architraves add depth to any space – reducing miter lines and elevating your look.

Great baseboards create a smooth transition from the floor to the wall, guiding you seamlessly from room to room. They work in harmony with your door and window casings, and should be slightly thinner than your casing for a proper installation.

# CASING

Casing is used generously in spaces and is often the most visible moulding in a room. Casings are primarily used to go around a door or window, covering the gap between drywall and the door or window frame. Casings are generally thicker than base mouldings, they bring a room together: left to right, top to bottom.

## T-ASTRAGAL

An astragal is commonly used as a seal between a pair of double doors, often in conjunction with a flush bolt. The astragal closes the clearance gap between two doors, making closing a pair of doors together easier. The vertical moulding attaches to a stile on one of a pair of doors against which the other door strikes or closes.

## BRICK MOULD

A brick mould is mainly used as exterior casing around doors, or in place of a crown or as a transition under window sills.

## QUARTER ROUND

A quarter round is a moulding that comes in several sizes and serves a variety of functions. Quarter Rounds are most often used with baseboards and can be useful to cover gaps where the baseboard meets the floor.

STOCK CODE	DIMENSIONS
MP105V (1567122)	3/4" x 3/4" x 16'

PFJ

## BASE SHOE

Base shoes are versatile profiles that work to solve numerous moulding and trim needs. Base shoes are primarily used to trim flooring materials and are often used in combination with a baseboard to conceal variations between the flooring and the base.

### CHAIR RAIL

Chair rail creates a beautiful room accent that's practical, yet decorative. Applied to a wall anywhere from 24 to 72 inches up from the floor, they can be used to protect the wall from scuffs and dents from the backs of chairs. The chair rail runs along the wall, parallel with the baseboard and is often paired with a wainscot treatment.

### DOOR STOP

A door stop is attached to the door jamb on both sides and at the top. It is where the door comes to a rest when it is closed, stopping the door from moving any further and covering the gap that would otherwise appear between the door and the jamb. In window trim, a stop holds the bottom sash of a double-hung window in place and can also be used as an apron under window stools.
