THE ART OF FORM

# METRIE

THE ART OF FORM

## WHO WE ARE

Since our beginnings as a small family-owned business in 1926, our dedication to creating high-quality, finely crafted architectural elements has helped us grow to become the largest supplier and manufacturer of solid wood and composite moulding in North America.

[METRIE.COM](http://METRIE.COM)

## DESIGN – PARTNERSHIP – CRAFTSMANSHIP

Our success is driven by a commitment to deliver excellence rooted in design, partnership and craftsmanship.

We believe beauty is in the details, and know that even the smallest of details adds up to create big differences.

Design is in our DNA, and permeates many aspects of our business. Our teams work on everything from trend forecasting to creating new profiles that meet the needs of our customers and homeowners.

We design and craft relationships you can count on – partnerships you can rely on. We collaborate with our partners while listening and talking to designers, architects, builders and contractors – adding value throughout the supply chain.

Our attention  
to the details  
helps people  
create beautiful  
interior spaces.  
Spaces to live,  
work and to truly  
call home.

FIND US, FOLLOW US, LIKE US & WATCH US!

## MANUFACTURING EXCELLENCE

Metrie operates five domestic manufacturing facilities between the U.S. and Canada. Our solid and finger-jointed wood mills are located close to their respective fiber sources to minimize the costs and environmental impacts of transportation while ensuring that all raw materials are responsibly sourced. Our state-of-the-art MDF mills are technologically advanced and designed for efficient operations, reflecting our customer commitment to delivering finely crafted, high quality products.

## UNMATCHED QUALITY

Our mills allow us the flexibility to provide the right solutions to the markets we serve, understanding regional differences and adhering to strict specification standards. In addition, we have the ability to design, test and produce exclusive profiles to satisfy a custom order or to stay on top of the latest home trends. We have full in-house CAD capabilities and use computer-generated templates to manufacture profiles to extremely tight tolerances. Metrie has built a reputation for setting some of the highest industry standards.

## RESPONSIBLE ACTIONS

With fine craftsmanship comes responsibility, and we are committed to being responsible stewards of forest resources. We strive to maximize the yield from every board using variable width and multiple rip-saws. Our resaws use ultra-thin blades to minimize saw kerf and any products that do not meet our length criteria are manufactured into finger-joint blocks to eventually become finger-jointed mouldings.

## Storage, Handling and Preparation of all Mouldings and S4S Boards

Prior to installation, it is important to acclimate your moulding and trim products by storing them in the installation space for at least 3 days. Wood and wood based products can expand and contract depending on internal and external environmental moisture levels. For best results, be sure to store products in a dry location and transport only if fully protected from water. Keep products clean from dirt and debris and finish according to paint and stain manufacturers' recommendations.

- 1 ARCHITRAVES:** In classical architecture, it described the main beam resting on the tops of the columns. Today it is often used as a decorative moulding for ornamentation or finishing at the top of windows and doors.
- 2 BASEBOARDS:** Baseboards are placed along the wall at the floor. They should be chosen to work in harmony with your casings to finish and tie the room together. Baseboards are usually thinner than the casing.
- 3 BUILD-UPS:** Combining two or more moulding profiles to create a new or custom look. Also called stacking, build-ups make it easy to create the look of custom made trimwork without the high cost.
- 4 CASINGS:** Casings define the overall character of a room and are often the most visible part of the trim. They are used primarily to cover the gap between drywall and the door or window frame. Casings are generally thicker than the base mouldings.
- 5 CROWNS:** Crowns are placed along the wall at the ceiling. They come in a wide range of patterns and sizes. Crowns soften the transition from wall to ceiling while adding a distinctive look and charm to your room.
- 6 FINISH BOARDS:** Finish Boards come in either S4S (Surfaced 4 Sides) or S3S (Surfaced 3 Sides) and are used for a multitude of purposes including shelving, window liner, bases, casing, etc.
- 7 PANEL MOULDS:** Panel Moulds are used to frame wall paneling and add an accent to your walls. Often used in furniture construction.
- 8 RAKE MOULD:** Rakes are often used as crowns. In fact, they are sometimes called "solid crowns".
- 9 WAINSCOT:** Trimwork installed in the area below a chair rail. Numerous options are available including raised panel, shadow box and beaded. Combined with a chair rail and baseboard, Wainscoting creates a dramatic look to any room.
- 10 WINDOW STOOL:** Also called window sill, a Window Stool is the surface installed below the sash of a window. Trim installed under window stool creates a distinctive look and adds a decorative touch.

ARCHITRAVES

ARCHITRAVES

High above windows and doors, architraves work to add grandeur to any space – reducing miter lines and elevating your look. A great architrave is, above all else, the dressing that’s built to impress.

BASEBOARDS

Your look starts here – at the foundation of a room.  
A great baseboard complements a casing and  
creates a smooth transition from the wall to the  
floor, guiding you seamlessly from room to room.

## BASEBOARD CAPS & SHOES

Baseboard caps are added to the top of regular baseboard moulding and flush to the wall to create a finished and more complex architectural moulding. Baseboard shoes are primarily used to trim flooring materials and are often used in combination with a traditional baseboard to conceal variations between the flooring and the base. However, this versatile profile works great to solve numerous trimming needs.

CASINGS

Casings bring a room together – left to right, top to bottom. And like any framing element, the options are endless, from build-ups of multiple pieces to full wraps. With casings, there's no wrong way, only your way.

## CHAIR RAILS

The chair rail runs along the wall, parallel with the baseboard. Adding a refined decor to any space, it's the subtle choice that makes a big impact. The chair rail perfectly complements a wainscot design.

## DOOR STOPS

### DOOR STOPS

The door stop mouldings are attached to the door jamb on both sides and at the top. It is where the door comes to a rest when it is closed, stopping the door from moving any further, and covering the gap that would otherwise appear between the door and the jambs.

## FULL ROUND

Full rounds are used for numerous purposes and projects. Some of the more common uses are closet poles, curtain rods and towel rods.

Stock Code	Dimensions
<b>1682568</b>	$1\frac{5}{16}" \times 1\frac{5}{16}" \times 16'$ <b>LVL</b>

## SASH BEAD

Narrow wood strips or moulding used for edging against a door or window sash, or to secure glass panels to doors and windows.

Stock Code	Dimensions
<b>MRFJBB1</b> (1577945)	$1\frac{1}{16}" \times 1\frac{1}{4}" \times 16'$ <b>FJR</b>

# MISCELLANEOUS

## LATTICE

A thin strip of flat moulding commonly used to hide seams and edges.

Stock Code  
**MSP267**  
(1382690)

Dimensions  
 **$\frac{1}{4}$ " x  $1\frac{3}{8}$ " x RL**

**PIN**

## MULLION

The upright or vertical member dividing the panels in a door. mullion is also the vertical member of a sash, window or door frame between openings in multiple opening frame.

Stock Code  
**MSP114MULL**  
(1578046)

Dimensions  
 **$\frac{3}{8}$ " x  $1\frac{1}{4}$ " x RL**

**PIN**

## PICTURE MOULD

A narrow moulding along the perimeter of the walls near the ceiling line traditionally used to support hooks for picture hanging.

Stock Code  
**MSP273**  
(1394398)

Dimensions  
 **$1\frac{1}{16}$ " x  $1\frac{3}{4}$ " x RL**

**PIN**

## SCREEN MOULDS

A very versatile profile; screen mould fits a wide variety of needs and uses. Traditionally used to hold mesh screening into wood screens, it also works well as edge trim on various shelving or wood trim for wallpaper.

Stock Code  
**MSP142**  
(1415968)

Dimensions  
 **$\frac{1}{4}$ " x  $\frac{3}{4}$ " x RL**

**PIN**

## QUARTER ROUND

Quarter Rounds come in several sizes and serve a variety of functions. They are most often used with baseboards.

Stock Code  
**MSP105**  
(1382360)

Dimensions  
 **$\frac{3}{4}$ " x  $\frac{3}{4}$ " x RL**

**PIN**

## STOOLS

A trim or casing applied immediately below the window sill.
